

ROBERTO EDEM

PROFESSIONAL SUMMARY

Dynamic and detail-oriented developer with a strong foundation in Python, JavaScript, React, and MySQL, complemented by hands-on experience in web development and software solutions.

Highly skilled in web development with focus on creating interactive and user-friendly websites. Can deliver innovative solutions and add significant value to businesses by leveraging keen understanding of coding languages and web technologies. Known for creativity, problem-solving abilities, and commitment to achieving best outcomes for clients.

WORK HISTORY

Freelance Web Developer, 08/2024 to Current

Private Clients, Remote - Uyo, Akwa Ibom State

- Designed and delivered custom web solutions using React, JavaScript, and MySQL, meeting diverse client requirements.
- Built a responsive camp website for a teenage camp, utilizing React and JavaScript to create an engaging platform for event schedules and registrations, improving user interaction by 40%.
- Developed a healthcare website for a client's company focused on elderly care, implementing MySQL for secured data management and React for dynamic, user-friendly interfaces.
- Created a personal portfolio for a glamour industry client, incorporating custom animations and modern styling with JavaScript and CSS to deliver a visually striking and interactive website
- Managed full project lifecycles, from requirement gathering to deployment, using Git and GitHub for version control to ensure scalable, client-focused solutions.

Web developer intern, 11/2024 to 07/2025

HNG Internship, remote - Uyo, Akwa Ibom State

- Fixed bugs on the company's website for smoother operation.
- Assisted in the development of new features to enhance user interaction.
- Developed responsive web applications using JavaScript, React, and HTML/CSS, enhancing user experience and interface functionality
- Collaborated with remote teams to implement front-end features, ensuring seamless integration with back end APIs
- Maintained up-to-date knowledge of coding languages, leading to efficient problem-solving skills.
- Incorporated feedback from end-users into subsequent versions of the website.
- Collaborated with design team to create visually appealing websites.
